

# CHAPTER 1

## INTRODUCTION TO ACCOUNTING AND BUSINESS

### DISCUSSION QUESTIONS

1. Some users of accounting information include managers, employees, investors, creditors, customers, and the government.
2. The role of accounting is to provide information for managers to use in operating the business. In addition, accounting provides information to others to use in assessing the economic performance and condition of the business.
3. The corporate form allows the company to obtain large amounts of resources by issuing stock. For this reason, most companies that require large investments in property, plant, and equipment are organized as corporations.
4. No. The business entity assumption limits the recording of economic data to transactions directly affecting the activities of the business. The payment of the interest of \$4,500 is a personal transaction of Josh Reilly and should not be recorded by Dispatch Delivery Service.
5. The land should be recorded at its cost of \$167,500 to Reliable Repair Service. This is consistent with the cost principle.
6.
  - a. No. The offer of \$2,000,000 and the increase in the assessed value should not be recognized in the accounting records.
  - b. Cash would increase by \$2,125,000, land would decrease by \$900,000, and stockholders' equity would increase by \$1,225,000.
7. An account receivable is a claim against a customer for goods or services sold. An account payable is an amount owed to a creditor for goods or services purchased. Therefore, an account receivable in the records of the seller is an account payable in the records of the purchaser.
8. (b) The business realized net income of \$91,000 ( $\$679,000 - \$588,000$ ).
9. (a) The business incurred a net loss of \$75,000 ( $\$640,000 - \$715,000$ ).
10.
  - (a) Net income or net loss
  - (b) Common stock and retained earnings at the end of the period
  - (c) Cash at the end of the period

**BASIC EXERCISES**

**BE 1-1**

**\$320,000. Under the cost principle, the land should be recorded at the cost to Tin Roofing.**

**BE 1-2**

**a.**

$$\begin{aligned}
 A &= L + SE \\
 \$690,000 &= \$375,000 + SE \\
 SE &= \$315,000
 \end{aligned}$$

**b.**

$$\begin{aligned}
 A &= L + SE \\
 \$690,000 + \$80,000 &= \$375,000 + \$51,500 + SE \\
 \$770,000 &= \$426,500 + SE \\
 SE &= \$343,500
 \end{aligned}$$

**BE 1-3**

- (2) Expense (Advertising Expense) increases by \$3,500;  
Asset (Cash) decreases by \$3,500.**
- (3) Asset (Supplies) increases by \$2,500;  
Liability (Accounts Payable) increases by \$2,500.**
- (4) Asset (Accounts Receivable) increases by \$18,750;  
Revenue (Delivery Service Fees) increases by \$18,750.**
- (5) Asset (Cash) increases by \$14,150;  
Asset (Accounts Receivable) decreases by \$14,150.**

- b. The accounting equation is relevant to all companies. It serves as the basis of the accounting information system.

**Ex. 1-2**

As in many ethics issues, there is no one right answer. Oftentimes, disclosing only what is legally required may not be enough. In this case, it would be best for the company's chief executive officer to disclose both reports to the county representatives. In doing so, the chief executive officer could point out any flaws or deficiencies in the fired researcher's report.

- b. A business transaction is an economic event or condition that directly changes an entity's financial condition or results of operations.

**Ex. 1-4**

Kroger's stockholders' equity:  $\$38,118 - \$30,283 = \$7,835$   
 Procter & Gamble's stockholders' equity:  $\$115,095 - \$67,516 = \$47,579$

**Ex. 1-5**

Dollar Tree's stockholders' equity:  $\$13,501 - \$7,858 = \$5,643$   
 Target's stockholders' equity:  $\$41,290 - \$29,993 = \$11,297$

- f. **(3) stockholders' equity (expense)**

**Ex. 1–9**

- a. **Increases assets and increases stockholders' equity.**
- b. **Decreases assets and decreases stockholders' equity.**
- c. **Decreases assets and decreases stockholders' equity.**
- d. **Increases assets and increases liabilities.**
- e. **Increases assets and increases stockholders' equity.**

**Ex. 1–10**

- a. **(1) Total assets increased \$183,000 (\$298,000 – \$115,000).**  
**(2) No change in liabilities.**  
**(3) Stockholders' equity increased \$183,000.**
- b. **(1) Total assets decreased \$80,000.**  
**(2) Total liabilities decreased \$80,000.**  
**(3) No change in stockholders' equity.**
- c. **No, it is false that a transaction always affects at least two elements (Assets, Liabilities, or Stockholders' Equity) of the accounting equation. Some transactions affect only one element of the accounting equation. For example, purchasing supplies for cash only affects assets.**

- a. 1. All financial statements should contain the name of the business in their heading. The statement of stockholders' equity is incorrectly headed as "Omar Farah" rather than We-Sell Realty. The heading of the balance sheet needs to be the name of the business.
2. The income statement covers a period of time and should be labeled "For the Month Ended August 31, 20Y7."
3. The year in the heading for the statement of stockholders' equity should be 20Y7 rather than 20Y6.
4. The balance sheet should be labeled "August 31, 20Y7," rather than "For the Month Ended August 31, 20Y7."
5. On the income statement, the miscellaneous expense amount should be listed as the last expense.
6. On the income statement, the total expenses are subtracted from the sales commissions, resulting in an incorrect net income amount of \$25,000. The correct net income should be \$24,150. This also affects the statement of stockholders' equity and the amount of retained earnings that appears on the balance sheet.
7. On the statement of stockholders' equity, there is no column for common stock. Also, the statement is for the "month" rather than for the "year" ended August 31, 20Y7.
8. Accounts payable should be listed as a liability on the balance sheet.
9. Accounts receivable and supplies should be listed as assets on the balance sheet.
10. The balance sheet assets should equal the sum of the liabilities and stockholders' equity.

- Stockholders' equity is the right of stockholders (owners) to the assets of the business. These rights are increased by issuing common stock and revenues and decreased by dividends and expenses.
- \$8,050 (\$25,500 - \$8,000 - \$5,500 - \$1,650 - \$1,500 - \$800)
- June's transactions increased stockholders' equity by \$79,050, which is the common stock of \$75,000 that was issued plus June's net income of \$8,050 less dividends of \$4,000.

**MAKE A DECISION****MAD 1-1**

a. **Ratio of Liabilities to Stockholders' Equity** =  $\frac{\text{Total Liabilities}}{\text{Total Stockholders' Equity}}$

Amazon:  $\frac{\$119,099}{\$43,549} = 2.73$

Best Buy:  $\frac{\$9,595}{\$3,306} = 2.90$

- b. Amazon's ratio is 2.73, which means the total liabilities are over 2 1/2 times as great as the stockholders' equity. For Best Buy, the ratio is higher at 2.90, which is almost three times greater than stockholders' equity. Thus, the margin of protection is slightly more for Amazon's creditors than it is for Best Buy's creditors.

**MAD 1-2**

a. **Ratio of Liabilities to Stockholders' Equity** =  $\frac{\text{Total Liabilities}}{\text{Total Stockholders' Equity}}$

Year 1:  $\frac{\$26,478}{\$10,953} = 2.42$

Year 2:  $\frac{\$28,652}{\$11,651} = 2.46$

Year 3:  $\frac{\$29,993}{\$11,297} = 2.65$

- b. The ratio of liabilities to stockholders' equity for Target increased from 2.42 in Year 1 to 2.65 in Year 3, causing the margin of protection to creditors to decrease.

**MAD 1–3**

a. **Ratio of Liabilities to Stockholders' Equity** = 
$$\frac{\text{Total Liabilities}}{\text{Total Stockholders' Equity}}$$

Year 1: 
$$\frac{\$118,290}{\$80,535} = 1.47$$

Year 2: 
$$\frac{\$123,700}{\$80,822} = 1.53$$

Year 3: 
$$\frac{\$139,661}{\$79,634} = 1.75$$

- b. The ratio of liabilities to stockholders' equity for Walmart increased from 1.47 in Year 1 to 1.75 in Year 3, causing the margin of protection to creditors to decrease.

*Note to Instructor:* This increase occurred because the company used debt to finance the repurchase of its common stock. This caused liabilities to increase and stockholders' equity to decrease over the three-year period. The increased use of debt financing was probably due to the low interest rates during this three-year period.

**MAD 1–4**

The ratios of liabilities to stockholders' equity are summarized below for Target (MAD 1–2) and Walmart (MAD 1–3).

	<u>Year 3</u>	<u>Year 2</u>	<u>Year 1</u>
Target	2.65	2.46	2.42
Walmart	1.75	1.53	1.47

Target's ratio of liabilities to stockholders' equity is more than that of Walmart for all three years. Thus, the risk to Target's creditors is more than that of Walmart's creditors. The three-year trend for both companies shows that the size of this ratio is increasing. However, Target appears to be more aggressive than Walmart in its use of debt.

**MAD 1–5**

a. **Ratio of Liabilities to Stockholders' Equity** = 
$$\frac{\text{Total Liabilities}}{\text{Total Stockholders' Equity}}$$

Wendy's: 
$$\frac{\$3,644}{\$648} = 5.6$$

Chipotle: 
$$\frac{\$824}{\$1,441} = 0.6$$

- b. The ratio of liabilities to stockholders' equity is 5.6 for Wendy's. This ratio is relatively high and suggests that creditors have risk with their investments. Specifically, the small level of stockholders' equity provides a low margin of protection for creditors.
- c. Chipotle's ratio of liabilities to stockholders' equity of 0.6 is extremely low and suggests that Chipotle is not using much debt to finance its operations. Given the low interest rates that are currently available in the market, Chipotle may be able to improve its profitability by increasing its use of debt.

## TAKE IT FURTHER

### TIF 1–1

- 1. The car repair is a personal expense and is Marco's personal responsibility. By using partnership funds to pay for the repair, Marco is behaving unethically because he is violating the business entity assumption. The business entity assumption treats the business as a separate entity from its owners. By taking money from the partnership for a personal expense, Marco is effectively stealing from his partners.**
- 2. The partnership's net income will be reduced by the \$2,000 Marco has taken. This will reduce the amount of net income available to Marco's partners.**
- 3. Marco could ask his partners for a loan from the partnership. The loan could be repaid out of his salary or from his share of the partnership income.**

## TIF 1–2

1. **Acceptable professional conduct requires that Colleen Fernandez supply First Federal Bank with all the relevant financial statements necessary for the bank to make an informed decision. Therefore, Colleen should provide the complete set of financial statements. These can be supplemented with a discussion of the net loss in the past year or other data explaining why granting the loan is a good investment for the bank.**
2. a. **Owners are generally willing to provide bankers with information about the operating and financial condition of the business, such as the following:**
  - **Operating Information:**
    - **Description of business operations**
    - **Results of past operations**
    - **Preliminary results of current operations**
    - **Plans for future operations**
  - **Financial Condition:**
    - **List of assets and liabilities (balance sheet)**
    - **Estimated current values of assets**
    - **Owner’s personal investment in the business**
    - **Owner’s commitment to invest additional funds in the business**

**Owners are normally reluctant to provide the following types of information to bankers:**

- ***Proprietary Operating Information.*** Such information, which might hurt the business if it becomes known by competitors, might include special processes used by the business or future plans to expand operations into areas that are not currently served by a competitor.
  - ***Personal Financial Information.*** Owners may have little choice here because banks often require owners of small businesses to pledge their personal assets as security for a business loan. Personal financial information requested by bankers often includes the owner’s net worth, salary, and other income. In addition, bankers usually request information about factors that might affect the personal financial condition of the owner. For example, a pending divorce by the owner might significantly affect the owner’s personal wealth.
- b. **Bankers typically want as much information as possible about the ability of the business and the owner to repay the loan with interest. Examples of such information are described above.**
  - c. **Both bankers and business owners share the common interest of the business doing well and being successful. If the business is successful, the bankers will receive their loan payments on time with interest, and the owners will increase their personal wealth.**

**Subject: Causes of Accounting Fraud**

**Business and accounting fraud typically result from either a failure of individual character or a culture of greed within an organization. Managers and accountants often face pressure to meet or exceed a company’s financial goals. At times, supervisors can place pressure on individuals to violate accounting standards to improve a company’s reported financial results. Individuals who give in to these pressures exhibit a failure of individual character. In other situations, a company may indirectly encourage employees to violate accounting rules as part of their job. This occurs in organizations that do not value ethical decision making or fair financial reporting and exhibit a culture of ethical indifference.**

**TIF 1–5**

he difference in the two bank balances, \$55,000 (\$80,000 – \$25,000), may not be pure profit from an accounting perspective. To determine the accounting profit for the six-month period, the revenues for the period would need to be matched with the related expenses. The revenues minus the expenses would indicate whether the business generated net income (profit) or a net loss for the period. Using only the difference between the two bank account balances ignores such factors as amounts due from customers (receivables), liabilities (accounts payable) that need to be paid for wages or other operating expenses, additional investments that Dr. Cousins may have made in the business during the period, or dividends paid during the period that Dr. Cousins might have taken for personal reasons unrelated to the business. Some businesses that have few, if any, receivables or payables may use a “cash” basis of accounting. The cash basis of accounting ignores receivables and payables because they are assumed to be insignificant in amount. However, even with the cash basis of accounting, additional investments during the period and any dividends paid during the period have to be considered in determining the net income (profit) or net loss for the period.
